

“FOOT POWER™”

Restore Strength, Improve Balance, Resolve Pain,
Live & Enjoy Life Confidently

Why does a strong foot Matter

80% of our population is walking around with functionally weak feet and you can help them. Strong stable feet keep you active, improves posture and reduces pain. Just because some foot and ankle injuries become pain free does not mean that the area is functionally strong. As we age, weaker feet means poor balance, leading to falls, injuries and loss of independence. Not to mention higher health care costs. Weak feet mean your knees, hips and lower back are in constant compensation which leads to dysfunction in those areas. We're designed to be barefooted on soft ground in a warm climate. Now we are walking on concrete or other hard surfaces with our feet stuffed in shoes.

Foot Power™ is The Solution

Strengthens your feet in just 2 minutes a day.
Safe, simple and effective for all ages, to help your patients become pain free, recover from injury, stay fit, prevent future problems or use for pre and post surgical rehabilitation.

How it Works

- ✓ While standing with your foot into the heel cup, press your forefoot and grip with your toes against the pedal which has resistance. Actively restores, toe flexion, foot plantar flexion, eversion, inversion and closed chain calf exercises.
- ✓ 4 resistance levels (children's, light, medium and heavy)
- ✓ Easy and natural to use at home (**Video tutorial**)

Key Benefits

- ✓ Suitable for all ages and fitness levels, ✓ Prevents falls and injuries
- ✓ Only rehab system that is biomechanically correct. You will see but everyone feels the improvement.
- ✓ *There's nothing like it anywhere in the world. Patented in the US, tested on over a thousand patients.*
- ✓ Doctors saw the same significant results. <https://vimeo.com/1123643175/185521fdb3?share=copy>
<https://vimeo.com/1110354091/df25205f56>
- ✓ Patients gave their experiences. <https://vimeo.com/manage/videos/1061321865/e15bb135f1>
- ✓ "Foot Power™" is a medically necessary and clinically proven device that meets Medicare requirements for treating specific foot diagnosed conditions .
