

FOOT POWER™

A remarkable new technological *breakthrough device* that revolutionizes the way you and your patients can do simple yet powerful Foot Rehabilitation.

Your wish to have biomechanically correct Progressive Foot rehabilitation in your office and in a patients homes is now available.

Your patients will see and feel the difference immediately. Whether you're using it for specific diagnosis or Pre and Post Surgical conditioning. Excellent for all intrinsic foot muscles and structural stability as well as extrinsic calf rehab. You will be amazed at how effective and easy to use this new equipment really is. Foot Power will increase circulation for all the diabetics, and is truly an amazing therapy for Peripheral Neuropathy patients. For seniors it will mean better balance and less danger of falling. The only people that do not get benefit are the ones that do not use it.
